

Malö Yachts is expanding.

In order to get a more efficient administration - and even more importantly - to get a more efficient material flow in production plus more production area, we are building a new office for production and design. The old office will create space for production machines and storage of material in direct connection to the hull's. The new office will be built as an extension of the production hall towards the harbour. Our plan is to have the new office completed in February.
