

MALÖ'S TARGA ARCH GIVES YOU AN UNIQUE AFT COCKPIT

STAY WARM AND DRY DESPITE BAD WEATHER

When the rain is heavy and the wind is cold it's not so inviting to be out cruising. But it could be. A Malö really comes into its own in this kind of weather. The cockpit is well protected beneath the full height cockpit cover and Targa arch and the visibility is clear through the fixed glass windscreen. With a Malö it's much easier to keep up good speed when not being cold or wet.
